IXeo

'A journey through'

I – Intuitive X – Concierge E – Electronic O – World

IXeo.com is the new and exciting global tourism gateway for the hotel and travel industry, providing travel from anywhere to anywhere. It is a live and interactive global reservations service for the tourism industry enabling travel professionals to dynamically build packages in real time. With over 85,000 hotels, 800 international airlines, full destination information, ground services and events, IXeo really is a one stop travel solution.

The launch of IXeo marks a shift in the distribution of travel. IXeo works alongside suppliers, providing them with a live platform and direct access to the marketplace. Suppliers can manage their own rates with free online access whilst still ensuring commission is paid to travel agents – an average 8% on all rooms sold on the site. Furthermore there are no maintenance or licence fees.

Agents should sign up at ix-agent.com to register for their commission payments. They can then access IXeo either through the leisure mode of their GDS or through a web interface. IXeo provides a full service from ticketing to cash management and fulfilment.

IXeo is easy to use, offering searches by 'hotel', 'motive' or 'country'. The website offers country-specific gateways where content is both descriptive and book-able. What to see, where to stay and what to do – from the best dive centre, to the top safari guide and a favourite hideaway hotel.

Graham Leslie, founder of IXeo, and former CEO of Serena Hotels (a subsidiary of the Aga Khan Fund for Economic Development) says, 'IXeo is the fastest, biggest and most content-rich website on the internet. Our aim is to provide a unprecedented and direct link between buyers and suppliers. We offer agents enhanced access to the world, with hotels they were previously unable to book. We are also committed to working alongside our suppliers and while making their product even more accessible we enable them to manage their own rates, inventory and brand identity.'

Peter Fitzgerald, President Representation of Pegasus Hotel Solutions says 'IXeo has developed a truly dynamic tourism network providing enhanced accessibility for any destination and to all hotels worldwide. The network supports hotel suppliers with a vastly improved product and distribution. We are delighted to partner with IXeo for live accommodation supply'.

IXeo works in partnership with all tourists boards in the world, Pegasus Solutions, Micros Fidelio, Synxis, i-hotelier, Columbus, Worldspan, Amadeus, Galileo, Sabre, ZTS, Merlin and What's On When.
